

## **BIBLIOGRAPHY:**

### **ARTICLES IN PEER REVIEWED JOURNALS:**

1. Power, C. A., C. L. Grand, **N. Ismail**, N. C. Peters, D. P. Yurkowski, and P. A. Bretscher. A valid ELISPOT assay for enumeration of ex vivo, antigen-specific IFN-gamma producing cells. *J. Immunol. Methods* 227:99-107, 1999.
2. **Ismail N**, and P. A. Bretscher. The Th1/Th2 nature of concurrent immune responses to unrelated antigens can be independently determined. *The Journal of Immunology* 163: 4842-50, 1999.
3. **Ismail N**, G. Hortelano, and A. Al-Hendy. Growth hormone gene therapy using encapsulated myoblasts. In *Cell Encapsulation and Therapeutics*, Eds. Kuhlreber WM., and Lanza RP. Birkhauser, Boston, USA. **1999**, ISBN 0-8176-4010-X
4. Bretscher, P. A., **N. Ismail**, J. N. Menon, C. A. Power, J. Uzonna, and G. Wei. Vaccination against and treatment of chronic diseases caused by intracellular pathogens: a perspective from studies in basic immunology, immunity in tuberculosis, and leishmaniasis and AIDS. *Cellular and Molecular Life Science* 58:1879-1896, 2001.
5. **Ismail, N.**, and B. Reisner. Update on Respiratory Syncytial virus. *Clinical Microbiology Newsletter* 23: 91-97, 2001.
6. Bretscher, P. A., **N. Ismail**, N. C. Peters, and J. Uzonna. Cell-to-cell interactions and signaling within the immune system: *Towards integrating mechanisms and physiology*. *New Foundation of Biology*; Berczi I., and Gorezynski, R. M. 2001, Elsevier Science B.V.
7. **Ismail N.**, and P. A. Bretscher. More antigen-dependent CD4+ T cell/ CD4+ T cell interactions are required for the primary generation of Th2 than Th1 cells. *European Journal of Immunology* 31:1765-71, 2002.
8. **Nahed Ismail**, Juan P. Olano, Hui-Min Feng, and David H. Walker. Current status of immune mechanisms of killing of intracellular pathogens. *FEMS Microbiology Letters* 207:111-120, 2002.
9. **Ismail, N.**, G. E. Fish, and M. B Smith. Laboratory evaluation of a fully-automated chemiluminescence immunoassay for rapid detection of Hepatitis B surface antigen (HBsAg), antibodies to HBsAg and antibodies to Hepatitis C virus, *Journal of Clinical Microbiology* 42:610-617, 2004.
10. Walker, D. H., **N. Ismail**, J. P. Olano, J. W. McBride, X. J. Yu, and H-M, Feng. *Ehrlichia chaffeensis*: A prevalent, life threatening, emerging pathogen.

*Transactions of the American Clinical and Climatological Association* 115: 375-384, 2004.

11. **Ismail, N.**, L. Soong, J. W. McBride, G. Valbuena, J. P. Olano, H-M, Feng, and D.H. Walker. Overproduction of TNF alpha by CD8<sup>+</sup> type-1 cells and downregulation of IFN-gamma production by CD4<sup>+</sup> Th1 cells contribute to toxic shock like syndrome in an animal model of fatal monocytotropic ehrlichiosis. *The Journal of Immunology* 172: 1786-800, 2004.
12. **Nahed Ismail**, B. Anthony, H. Briscoe, and P. Bretscher. Increasing the foreignness of an antigen, by coupling a second and foreign antigen to it, increases the Th2 component of the immune response to the first antigen. *Immunology* 115:34-41, 2005.
13. Jochen Mattner, Kristin L. DeBord, **Nahed Ismail**, Dapeng Zhou, Carlos Cantu III, Pierre Saint-Mezard, Vivien Wang, Kasper Hoebe, Olaf Schneewind, David H. Walker, Bruce Beutler, Luc Teyton, Paul B. Savage, Albert Bendelac. Both exogenous and endogenous glycolipid antigens activate NKT cells during microbial infections. *Nature* 434:525-9, 2005.
14. **Nahed Ismail** and David Walker. Balancing protective immunity and immunopathology: A Unifying model of monocytotropic ehrlichiosis. *Annals of the New York Academy of Science* 1063:420-4, 2005.
15. Rita De Sousa, **Nahed Ismail**, Sonia Doria-Nobrega, Pedro Costa, Tiago Abreu, Ana Franca, Mario Amaro, Paula Proenca, Paula Brito, Jose Pocas, Teresa Ramos, Graca Cristina, Graca Pombo, Liliana Vitorino, Jorge Torgal, Fatima Bacellar, and David H. Walker. The presence of Eschars in Portuguese patients infected with Israeli tick typhus strain of *Rickettsia conorii*. *Annals of the New York Acad. of Science* 1063:197-202, 2005.
16. Patricia A. Crocquet-Valdes, Jere M. McBride, Hui-Min Feng, **Nahed Ismail**, Mellissa A. Small, Xue-Jie Yu and David H. Walker. Analysis of ehrlichial P28 gene expression in a murine model of persistent infection. *Annals of the New York Academy of Science* 1063:420-4, 2005.
17. Kai McKinstry, Nahed Ismail, Nathan Peters, Tara Strutt, and Peter A. Bretscher. Non-interference, independence and coherence of immune responses: Implication For macroimmunology and strategies of intervention. Altered immunoregulation and human disease, 93-113. Editor: Reginald M. Gorczynski, 2005.
18. David H. Walker, **Nahed Ismail**, Juan P. Olano, Gustavo Valbuena, and Jere McBride. Pathogenesis, immunity, pathology, and pathophysiology in rickettsial diseases” Rickettsial Diseases: Old and New, **2006**, Raoult and Parola, Marcel Dekker Inc.

19. **Nahed Ismail**, Heather L. Stevenson, and David H. Walker. The Role of TNF- $\alpha$  and IL-10 in the pathogenesis of severe murine monocytotropic ehrlichiosis: Increased resistance of TNF receptor p55- and p75-deficient mice to fatal ehrlichial infection. *Infection and Immunity* 74: 1846-56, 2006.
20. Heather L. Stevenson, Ziad Peerwani, Jeffrey M. Jordan, Hui-Qun Wang, David H. Walker, and **Nahed Ismail**. An intradermal environment promotes a protective type-1 response against monocytotropic *Ehrlichia*. *Infection and Immunity* 74:4856-64, 2006.
21. Stevenson, H. L. **Ismail, N.**, and D. H. Walker. Ehrlichiae and ehrlichiosis: Pathogenesis and vector biology. National Institute of Allergy and Infectious Disease: Progress in Research, 2006.
22. Essam, A., Salama S, A., **Ismail, N.**, Al-Hendy, A. Towards gene therapy of endometriosis: Adenovirus-mediated delivery of dominant negative estrogen receptor gene inhibits cell proliferation, reduces cytokine production, and induces apoptosis of endometriotic cells. *Fertility and Sterility* 88:462-7, 2007.
23. P. Rocco LaSala, Candace Sanders, Kimberly K. Bufton, **Nahed Ismail**, Michael B. Smith. Prospective comparison of R-mix™ shell vial system with direct antigen tests and conventional cell culture for respiratory virus detection. *Journal of Clinical Virology* 38:210-6, 2007.
24. Rong Fang, **Nahed Ismail**, Lynn Soong, Vsevolod L. Popov, Ted Whitworth, Donald H. Bouyer, and David H. Walker. Differential interaction of dendritic cells with *Rickettsia*: impact on host susceptibilities to murine spotted fever rickettsiosis, *Infection and Immunity* 75:3112-23, 2007.
25. **Nahed Ismail**, Heather Stevenson, Emily Crossley, and David H. Walker. The relative importance of T cell subsets in immunity and immunopathology of monocytotropic ehrlichiosis: A novel effector mechanism involved in *Ehrlichia*-induced immunopathology in murine ehrlichiosis. *Infection and Immunity* 75:4608-20, 2007.
26. Rita de Sousa, **Nahed Ismail\***, Sónia Dória Nobrega, Ana Franca, Mário Amaro, Margarida Anes, José Pocas, Ricardo Coelho, Jorge Torgal, Fátima Bacellar, David H. Walker. Intralesional IFN- $\gamma$ , TNF- $\alpha$ , IL-10, iNOS, indoleamine-2, 3-dioxygenase, and RANTES are major immune effectors in Mediterranean spotted fever rickettsiosis. *\*first & second Authors contributed equally, Journal of Infectious Diseases* 196:770-81.2007.
27. Walker DH, **Nahed Ismail**, and Xuejie Yu. Vaccines against rickettsial infections, In Vaccines against bioterror and Emerging Infectious Diseases”, Elsevier, 2007,

28. Heather Stevenson, David H. Walker, and **Nahed Ismail**: Regulatory role of CD1d-restricted NKT cells in the induction of toxic shock-like syndrome in an animal model of fatal ehrlichiosis. *Infection and Immunity*, 2008, 76:1434-44.
29. Nagaraja Thirumalapura, David H. Walker, and **Nahed Ismail**: Protective heterologous immunity against fatal ehrlichiosis and lack of protection following homologous challenge. *Infection and Immunity*, 76:1920-30, 2008.
30. David H. Walker and **Nahed Ismail**: Rickettsiosis: Emerging and re-emerging endothelial infection and early disease events. *Nature Reviews Microbiology*, 6:375-86. 2008.
31. Rita de SOUSA, Ana Franco, Sónia Doria, Mario Amaro, Tiago Abreu, José Pocas, Paula Proenca, Ricardo Coelho, José Vaz, Jorge Torgal, Fátima Bacellar, **Nahed Ismail**, David H. WALKER. Host and microbial risk factors and pathophysiology of fatal *Rickettsia conorii* infection in Portuguese patients. *Journal of Infectious Disease*, 198:576-85, 2008.
32. Alwyn Rapose, Scott D. Lick, and **Nahed Ismail**. *Listeria grayi* in a heart transplant. *Transplant infectious disease*, 10:434-6, 2008.
33. Sunil Thomas, Nagaraja Thirumalapura, Emily Crossley, **Nahed Ismail**, David H. Walker Antigenic protein modifications in *Ehrlichia*, *Parasite Immunology*, 31:296-303, 2009.
34. Duane Hamilton, **Nahed Ismail**, David Kroeger, Christopher Rudulier, Peter Bretscher. Macroimmunology and immunotherapy of cancer. *Immunotherapy*, 31:296-303, 2009.
35. Fang Rong, **Nahed Ismail**, David. H. Walker. CD4+CD25+ Foxp3-CTLA-4+ T regulatory cells are the major source of IFN-gamma and IL-10 in acute fatal rickettsial infection. *Infection and Immunity*, 77:3838-49, 2009.
36. Thirumalapura NR, Crossley EC, Walker DH, Ismail N. Persistent infection contributes to heterologous protective immunity against fatal ehrlichiosis. *Infection and Immunity*, 2009

## BOOK CHAPTERS AND REVIEWS

1. Stevenson, H.L., Estes, D.M. , Thirumalapura, R. N., Walker, D.H. and N. Ismail. Natural Killer Cells Promote Tissue Injury and Systemic Inflammatory Responses during Fatal *Ehrlichia*-Induced Toxic Shock-like Syndrome. Submitted to *American Journal of Pathology*, 2009.
2. **Ismail N**, G. Hortelano, and A. Al-Hendy. Growth hormone gene therapy using encapsulated myoblasts. *In Cell Encapsulation and Therapeutics*, Eds. *Kuhtreber WM.*,

and Lanza RP. Birkhauser, Boston, USA. **1999**, ISBN 0-8176-4010

- 3.** Bretscher, P. A., **N. Ismail**, N. C. Peters, and J. Uzonna. Cell-to-cell interactions and signaling within the immune system: *Towards integrating mechanisms and physiology*. *New Foundation of Biology*; Berczi I., and Gorezynski, R. M. **2001**, Elsevier Science B.V.
