

Changing Your Course Display

Would you like to customize how your courses display on **My Bb Home** and **My Bb Courses and Tutorials**? You can decide what and how much information to show on each of these pages using **Personalize: My Courses** and **Personalize: Course List**.

1. On the **My Bb Home** page, click on the **Manage My Courses Module Settings**, the small round link located on the right hand side of the **My Courses** Header.

2. The **Personalize: My Courses** page is displayed. Under **Edit Course List** you can check or uncheck the option boxes to display or hide course name, Course ID, Instructors, Announcements, Tasks, and Calendar events.

3. Click **Submit** to apply the changes.

You can use the same process for the **My Bb Courses and Tutorials** page under the **Course List** heading.
